

Cyber Acoustics New CA Essential Wireless Headset Offers Comfort, Clarity, and Durability for Demanding Work Environments

Perfect for call centers, busy offices, or working from home, the HS-1500BT delivers high-quality, reliable audio no matter where you are

Vancouver, Wash., May 2, 2023 – [Cyber Acoustics](#), a leading manufacturer of reliable and affordable computer peripherals used in schools, businesses, and homes, today announced the [CA Essential Wireless Headset HS-1500BT](#). Designed for comfort, clarity, and durability, the CA Essential Wireless Headset HS-1500BT delivers high-quality, reliable audio in busy offices, call centers, or while working remotely.

An on-ear headset with two types of noise-canceling technology

The CA Essential Wireless Headset HS-1500BT features two types of noise-canceling technology, providing high-quality audio while speaking and listening. Environmental Noise Cancellation (ENC) minimizes background noise so you sound clearer to those you are speaking with. Active Noise Cancellation (ANC) reduces low-frequency sounds like air conditioners and other background noise so you more clearly hear your calls or music.

In addition, the on-ear design of the HS-1500BT may reduce the effects of what [The New York Times](#) has labeled “eardrum suck.” This discomfort some listeners experience when using ANC technology in over-the-ear headphones can include eardrum pain, headaches, dizziness, or nausea.

“The feeling of motion sickness with headphones and headsets with ANC technology is something several of our employees personally experience,” said Steve Erickson, COO at Cyber Acoustics. “An on-ear design may help reduce this discomfort by eliminating the seal around the ears while still offering the benefits of Active Noise Cancellation.”

Additional CA Essential Wireless Headset HS-1500BT features

The CA Essential Bluetooth Headset HS-1500BT has an MSRP of \$69.99 and is available now on Amazon and through most IT and reseller channel partners. Bulk purchase discounts are available. Features include:

- Compatible with all unified communications (UC) platforms, including [Microsoft Teams](#), [Skype for Business](#), [Zoom](#), [Slack](#), and [Google Meet](#)
- Bluetooth connection to two devices at once. Connect to a PC or Mac utilizing the included USB-A Bluetooth dongle and separately to a smartphone
- Convenient controls for answering/ending calls, volume +/-, mute and busy light, as well as seamless switching between connected devices
- Simply mute by rotating the microphone boom arm up
- Lightweight design for all-day comfort with soft padded earcups and headband that relieves pressure on your head while providing a secure fit

- Battery playtime is approximately 30 hours, recharge via the included USB-C cable (headset can be used while charging)
- Plug-and-play headset with no software to update or install
